INNOVATION IN DESIGN  TRADITION IN BUILDINGTM

ARTIST

The **Artist Series** extends the traditional semi-hollow body design with...

- Hand carved spruce top
- Hand carved mahogany body and center block
- Maple Neck
- Long tenon set neck construction
- 25 1/2" scale, 1 11/16" nut
- Fretboard Radius 11"
- 15 1/4" wide body 1 3/4" deep
- Nashville type bridge, stud tailpiece
- RFID Security Chip
- Plek™ prepared setup followed by our own adjustments

The body is two piece select mahogany. The center block is part of the body, and is carved from the back to create a more efficient transfer of vibration. A unique center section is also carved from the inside of the top so it connects to the center block, and the back. The long neck tenon fits snugly in the block, allowing the back, top, and neck to form a single vibrating structure.

Standard Model

- 2 "Vintage" output hum cancelling pickups
- Rosewood fingerboard with Dot Inlay
- Single Ply Binding
- 2 volume and 2 treble controls (custom taper); each treble control is matched to the pickup
- 3-way toggle switch

Deluxe Model

- 2 Pickups with Multi-Voice Magnetics™
- Ebony Fingerboard with Dot Inlay
- Multi-ply Binding
- Master Volume and Master Treble Control
- One Coil Notch™ Control for Each Pickup

Coil Notch™ controls the coils and their sounds to deliver multiple tonal 'voices' for each pickup.

PERFORMER

The **Performer Series** features...

- Solid body design (although there are several chambered areas for controls)
- Carved two-piece alder body with the compact body shape of the Soloist – 13" lower bout
- Double cutaway design
- Carved book matched maple top
- Maple Neck
- Our long tenon set neck construction
- 25 1/2" scale, 1 11/16" nut
- Fretboard Radius 12"
- 13" wide body 1 3/4" deep
- Nashville type bridge, stud tailpiece
- RFID Security Chip
- Plek™ Prepared Setup Followed by Our Own Adjustments

Standard Model

- 2 "Hot" output hum cancelling pickups
- Rosewood fingerboard with Dot Inlay
- Single Ply Binding
- 2 volume and 2 treble controls (custom taper); each treble control is matched to the pickup
- 3-way toggle switch

Deluxe Model

- Ebony Fingerboard with Dot Inlay
- Multi-ply Binding
- Master Volume and Master Treble Control
- Custom 5 position blend control for the 'middle' toggle position
- One Coil Notch™ Control for Each Pickup (designed for this body cavity and these pickups)

The Multi-Voiced Magnetics™ and Coil Notch™ technologies are tuned to the alder body. The combination of the alder body, maple top, and maple neck is fairly bright and almost 'overly articulate.' The pickup and circuit are tuned to balance that acoustic profile to provide warm mid range tones as well.
